To prevent the following attachments:

- Hook horn
- Be sure rip sawing area
- Rotate cab for
- Use spotter if view
- Follow above even if travel alarm and mirror

...ing machine or its
 Be sure no one is on or near machine or in
 swing area.
 - Rotate cab for full view of travel path if it
 can be done safely.
 - Use spotter if view is obstructed.
 Follow above even if machine equipped with
 travel alarm and mirrors.

DANGER

Electrocution Hazard
 Serious injury or death will occur if
 machine or attachments are not kept
 away from electric lines.
 Maintain a minimum clearance in
 accordance with this chart

DC VOLTAGE	MIN. DISTANCE
120 V AC	10 FT (3.05 M)
240 V AC	15 FT (4.57 M)
360 V AC	20 FT (6.10 M)
480 V AC	25 FT (7.62 M)
600 V AC	30 FT (9.14 M)
750 V AC	35 FT (10.67 M)
900 V AC	40 FT (12.19 M)
1000 V AC	45 FT (13.72 M)

WARNING

This machine is equipped with a control
 pattern selector valve.
 To prevent personal injury caused by
 mistaken operation, always check that
 the movement of the machine matches
 the pattern shown on the control pattern
 card when operating machines.

- When checking the movement of the
 machine, check that the surrounding
 area is safe and operate the machine
 slowly.
- If the movement does not match the
 control pattern card, replace the card
 with the card showing the correct
 control pattern.
- Always do as follows when changing
 the control pattern.
 - Lower the work equipment to the
 ground, stop the engine, and set the
 park lever in the LOCK position.
 Then change the control pattern.

EXPLOSION WARNING

Unintentional detonation may be caused
 by an active radio transmitter in a
 blast zone.

To prevent SEVERE INJURY or DEATH,
 keep machine a safe distance away
 from a blast zone and a detonator or
 disconnect the wireless monitoring or
 system in accordance with instructions
 in the Operation and Maintenance
 Manual.

Failure to
serious injury or death.

09833-03000

WARNING

EXPLOSION HAZARD
Unintentional detonation may be caused by an active radio transmitter in blast zone.

To prevent SEVERE INJURY or DEATH, keep machines a safe distance away from a blast zone and a detonator or disconnect the wireless monitoring system in such places with instructions in the Operation and Maintenance Manual.
